Summary

I am a Frontend Developer with over 6 years of experience in crafting scalable web and mobile applications using technologies like React, React Native, Flutter and Dart. My strong expertise in responsive UI design, state management, and performance optimization has enabled me to deliver user-centric applications across various platforms. I am passionate about leveraging best practices in software development to exceed user expectations

Experience

KSNALabs

Lead Frontend Developer

03/2023 - 11/2025

- Identified and resolved a critical performance issue in the company's flagship product by implementing lazy loading and code splitting techniques, resulting in a 40% reduction in page load times and a 15% increase in user engagement.
- Developed and maintained a React-based dashboard for the sales team, enabling them to monitor key performance indicators in real-time and make data-driven decisions. The dashboard helped increase sales by 15% quarter-over-quarter.
- Expanded and maintained responsive web applications using React, Redux, and TypeScript. Utilized Jest and Enzyme for unit testing and Webpack for module bundling. Integrated RESTful APIs using Axios.
- Utilized React Hooks and Context API to create reusable and modular code, resulting in a 20% reduction in codebase size.
- Collaborated with UX designers to create intuitive and responsive user interfaces, resulting in a 30% increase in user satisfaction scores
- Enhanced a new user-friendly interface for the company's web app, leading to a 20% increase in user registrations.
- Decreased customer complaints by 40% by solving user journey bugs and improving interface design.

Cloud Express Solution Pvt. Ltd

Software Developer

08/2019 - 03/2023

- Designed RESTful API endpoints to handle requests efficiently, improving server response time by 30%
- Optimized the application's performance by reducing the bundle size by 25% and improving the Lighthouse score from 80 to 95
- Set up automated CI/CD pipelines that reduced code integration time by 40%, resulting in faster software releases.
- Integrated third-party APIs into applications, which improved web scalability by 30%
